## DETAILED ACTION

### *Ex Parte Quayle*

This application is in condition for allowance except for the following formal matters:

### *Claim Objections*

1. Claims 1-5 are objected to because of the following informalities:

With respect to claim 1, in lines 3-4, replace "a plurality of computer-readable instructions" with --a plurality of computer-executable instructions to be executed by the processor--.

Claims 2-5 are objected for the reason as set forth in objected independent claim 1.

Appropriate correction is required.

### *Allowable Subject Matter*

2. Claim 1-5 contain the allowable subject matter but objected to for minor informalities. Claims 6-13 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not teach or fairly suggest determining a first transmission energy setpoint as a function of the first transmission frame error rate and a first transmission quality, wherein the determination of the first transmission energy setpoint is responsive to an update trigger and determining a retransmission energy setpoint as a function of the retransmission frame error rate and a retransmission quality, wherein the determination of the retransmission energy setpoint is responsive to an update trigger, as specified in independent claim 1.

The prior art does not teach or fairly suggest adjusting the first transmission energy setpoint on occurrence of a first transmission error, wherein the first transmission error is

received from a receiver and adjusting retransmission energy setpoint on occurrence of a retransmission error, wherein the retransmission error is received from the receiver, as specified in independent claim 6.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
